Conditional Registration

Conditionally registered organisations have been assessed by Transport and Main Roads as suitable for full registration, subject to finalising one or more scheme elements. The conditional registration status should not negatively impact on the company's suitability to perform traffic management services during the registration period.

Location of Services

These are the locations where the organisation has indicated that it is able to provide services. Where this is noted as “N/A”, the organisation only provides traffic management services relevant to its own project/construction work, and therefore does not provide traffic management services commercially to the public.

Scope of registration

O = Operational Traffic Control (stop/slow traffic control)

S= Set up/ Implementation of Traffic Guidance Schemes

D= Design, presentation and review of Traffic Management Plans (TMPs) and Traffic Guidance Scheme (TGS) documentation.

Site Inspections and audits

Organisations having “D” on scope are registered to deliver traffic management site audits and inspection services.

Organisations having “O” or “S” on scope must ensure compliance to the TGS for the site that the traffic is being controlled for.
