Scenic Foreshore

Development ensures that Cardwell remains a quiet coastal village built around a striking view of the ocean and providing a tourism hub for motorists.

Cultural Tourism

The Cardwell business and tourism precincts contain village activity centre activities. Within these precincts there is a concentration of commercial activities and employment primarily servicing a range of local industries, notably those with a cultural and tourism focus.

Investigation Area

Council supports the development of the land outside of the urban footprint and to the West of the township of Cardwell for urban purposes. This land will be developed in accordance with a master plan to ensure the appropriate sequencing of development.
